

Bottom Up Technologies Corporation (BT Corp) is a leading NANOTECHNOLOGY SOLUTIONS provider as well as nanomaterials supplier to almost all manufacturing industries around the globe.

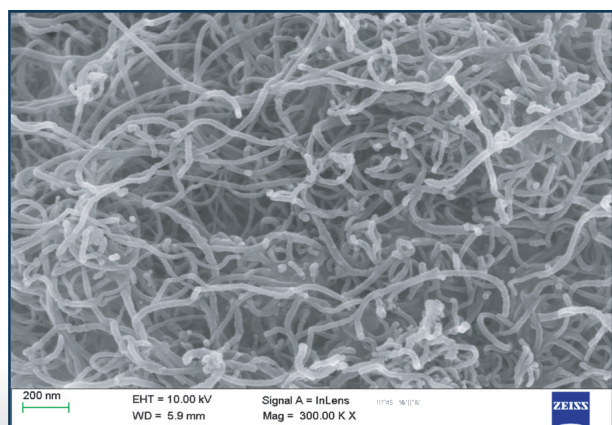

The scale, breadth, and depth of their technology are unmatched and sustain a complex & new industry. They provide an open and stable platform to deliver flexible, reliable, and scalable solutions. They pioneered process engineering for

Super Graphene

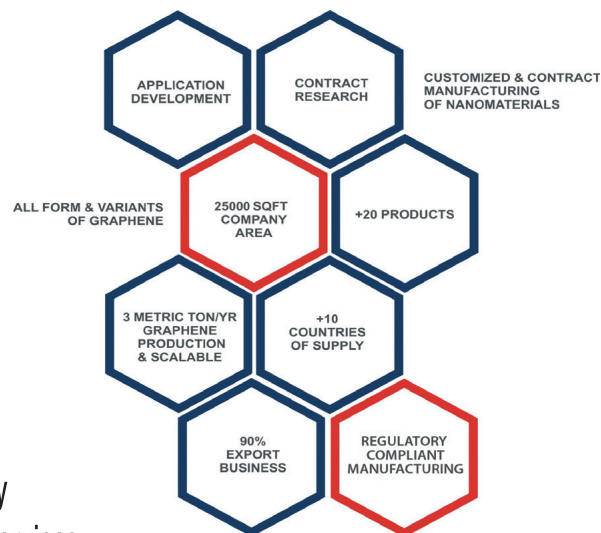

Carbon Nanotubes Single Wall CNT

CARBON NANOTUBE -Multiwall obtained from our in house manufactured CVD SET UP

mass production & supply of Graphene as well as customization & tailoring of nanomaterials to cater to specific application based demands, both as a technology provider & contract research services.

A nano-innovations company with the extended background of performance & satisfied customers put them at the forefront of transitioning nanotechnology from research to business. Their current service and product sales record includes 90% of overseas clients, and they have an incredible global presence.

BT CORP DOES CUSTOM MANUFACTURING WITH PRODUCTS TAILORED TO CUSTOMERS' REQUESTS

Product Offerings:

RAW MATERIALS

- All Variants of Graphene, graphene Oxide & Reduced Graphene Oxide
- All Variants of Carbon Nanotube
- Metallic Nanoparticles
- Customized & Functionalized

INTERMEDIATES

- Stable Dispersion of Nanomaterials in Common Solvents
- Master Batch in all Thermoplast & Thermoset Resin
- PP, LLDPE, PA, PC

FINISHED PRODUCTS

- Graphene Paint for Surface Protection
- Conductive Paint & Coating
- Water Proofing Paint
- Graphene Reinforced Yarn
